PERSONAL PROJECTS

Project: Online Calculator (05/2021 - 06/2021)

- This is a web application which provides online calculator to the end user. Where user can use it to calculate basic mathematical operations.
- Roles and Responsibility:** End to end development.
- Technologies used:** HTML CSS and JavaScript to design this website. Application Link. [🔗](#)

Project: Mobile Productivity App with Local Data Storage. (02/2023 - 02/2023)

- Developed a mobile application using React Native and TypeScript to help users stay organized and productive. Implemented local data storage using Async storage for secure storage of daily tasks. Demonstrated my ability to design and develop cross-platform applications for both Android and iOS devices. This project provided valuable experience in mobile application development and collaboration.
- Roles and Responsibility:** End to end development.
- Technologies used:** used "React Native", TypeScript and "Async Storage" to save the Task details in the local Storage.

Project: Blog your trip (03/2020 - 03/2020)

- This is a web-based application, where end user can come and blog their trips and user can visit another blogger blog as well.
- Roles and Responsibility:** I have worked for design and development both.
- Technologies used:** HTML, CSS and jQuery to design the frontend. Application Link. [🔗](#)

Project: Daily Task Manage

- Developed a web application, which helps end user to manage their daily task. Also the user can add complete to-do list for the day with description and delete task from the list after completing task.
- Roles and Responsibility:** End to end development.
- Technologies used:** HTML CSS and JavaScript to design this website. Application Link. [🔗](#)
